Request Information	
Request Description	
System should calculate how many barrel needed for stored olive oils under 10 ms.	
Justification	
This requirement is necessary because the olive oil that are stored are put in barrels, so the system calculates the number of barrels needed for this task and this calculation should be done in 10ms. Eventually, the barrel supplier files can be updated according to new barrels required.	
Effect if declined (Risk if the project request is declined)	
10 ms is enough for the system. Its rejection will affect the operation of the system.
