Request Information	
Request Description	
System should update weather condition datas from internet every day.	
Justification	
This requirement is necessary because the olive oil producer needs to check the current weather condition. One of the criteria that is considered when forecasting about earnings is new weather conditions taken from the Internet. Therefore, weather condition is updated every day.	
Effect if declined (Risk if the project request is declined)	
If the weather condition is got wrong or could not be taken from the Internet, the user might see the results and the system or even cannot see them. On the other hand, the system might make wrong calculations about the forecast of earnings or even might not calculate them. These risk may happen when the request is declined.
